

What should I do with leftover Paint?

To properly dispose of leftover paint the following are the recommended disposal options.

REDUCE

First - Buy only what you need and return any unopened cans. If you are at the end of a job and realize you need only a small amount to finish, exchange the unopened can for a smaller quantity.

REUSE

If you do have leftover paint, use it as an undercoat, second coat, touch-ups, projects (fences, birdhouses, basements), offer it to a friend or neighbor, OR donate leftover paint to community groups, schools, local theater group, recreation department, sign painter, etc.

RECYCLE

Usable leftover latex paints can be blended together to produce a gray or beige paint. Oil-based paints may also be mixed together. **DO NOT MIX OIL-BASED PAINT AND LATEX PAINT.**

DISPOSE OF PAINTS SAFELY AND PROPERLY

Bucks, Chester, Delaware, Montgomery and Philadelphia counties are working together to help rid the environment of Household Hazardous Waste (HHW). If the dates in Bucks County are not convenient, you may participate in any of the above counties' collection events. For additional dates and information call the Pennsylvania Department of Environmental Protection Recycling Hotline at 800-346-4242, the Bucks County Planning Commission at 215-345-3400, or visit our website: www.buckscounty.org/recycling.

Latex Paint

Latex paint is not hazardous waste. Latex paints are water-based and are safer alternative than oil-based paints. But if the paint is unusable and you must get rid of it, there are things you can do.

The goal is to simply get the latex paint (which is water based) into a non-liquid form. This can be done in one of two ways.

1. **Let it air dry** – Lift off the lid, place the can away from children and pets, and allow the water content of the paint to evaporate. Once it does, the semi-dry to dry paint left in the bottom of the can may be placed in a plastic trash bag and disposed in your regular waste pick-up.
2. **Mix it with "kitty litter" or other absorbent** – If it takes too long to evaporate the water content, you can mix the paint with an absorbent (clay based kitty litter, vermiculite, shredded newspaper, or shop "oil-dry" absorbent). This can be done in the paint can itself if you have only a quart or so in the can, or in a plastic tray. Mix 2 to 4 cups of absorbent into each quart of paint. After the absorbent has soaked up the paint and it is no longer a liquid, dump it onto a couple layers of newspaper, wrap it up and place it in a plastic trash bag and dispose of it in your regular waste pick-up. If you mixed the absorbent into the paint right in the can, simply place the open can and its non-liquid contents into a trash bag for disposal.

Oil-Based Paint

Save oil-based paint for one of the following Bucks County Household Hazardous Waste Collections.

May 27, 2017

Harry S. Truman High School
3001 Green Lane, Levittown—Bristol Township

June 17, 2017

Upper Bucks Technical School
3115 Ridge Road—Bedminster Township

July 22, 2017

Central Bucks South High School
1100 Folly Road—Warrington Township

August 5, 2017

Strayer Middle School
1200 Ronald Reagan Drive, Quakertown—Richland Township

August 26, 2017

Bucks County Technical High School
610 Wistar Road—Bristol Township

All Collection Events will take place rain or shine from 9:00 a.m. to 3:00 p.m.

Latex Paint

is not

hazardous

waste.

Dispose of it

properly.

**Dry paint out or add absorbant
and throw away in your regular waste pick-up.**
